Re : **Evolution of the shunt park and harness on JSRC**

Dear Sirs,

We inform you of an important evolution done on the vehicle JSRC Range with engine DCI, concerning the shunt park.

Après Vente

The shunt park is now situated on the fuse box. To change the position of the shunt park from park to use, you must change the position of the fuse of 30 A.

Park position

Use position

This evolution is effective starting from the following serial number:

- | | |
|-------------------------|----------------------------------|
| . JS RC moteur Dci | VH862-----1110966 |
| . JS RC moteur Progress | modification not done yet |

Following to this modification, the spare part reference of passenger compartment and engine has changed :

- | | |
|-----------------------------------|---------|
| - Passenger compartment harness : | 1403946 |
| - Right engine harness : | 1403747 |

Remaining at your disposal, Best regards,

After Sales Dept
